XEILOS TRADING TRADING ACADEMY

Interested in making money through the stock market?

Xeilos Trading — formerly known as Diamond Trading — is a specialized school in finance and trading, offering high-level training programs.

THE ADVANTAGES OF XEILOS

XEILOS

is a certified training academy, officially recognized by the French State and Qualiopi-accredited.

STRONG EXPERTISE

Xeilos instructors have over 15 years of experience in both trading and teaching, ensuring a high standard of education.

A SECURE CAREER PATH AFTER THE PROGRAM

Thanks to strong partnerships, **Xeilos** helps its students enter the professional trading world.

You no longer need to invest your own capital to start earning.

Today, Prop Firms offer a new opportunity — these are companies that provide their own capital to traders, allowing them to trade on the markets and share the profits generated.

Xeilos delivers Level 7 RNCP-certified qualifications as well as degrees officially recognized by the French State, ensuring the formal recognition of your skills and opening up real career opportunities in the financial sector.

ONLINE PROGRAMME

A complete 3-part structure: self-paced learning available 24/7, live classes every day, and personalised support throughout your journey.

FUNDING ELIGIBILITY

Xeilos programs are eligible for government funding, making it easier to successfully retrain or change careers.

HOW DOES IT WORK?

After validating your skills, you gain access to a real funded account and can begin trading to generate income.

Why Trade for a **Prop Firm**?

- **Funded Capital** – The firm provides the capital you need, reducing your personal financial risk.
- **Professional Tools** – Access to cutting-edge technology and real-time market data.
- **Network & Support** – Join a community of traders to exchange strategies, ideas, and experience.

TRUSTED BY THESE PARTNERS

LEELOO

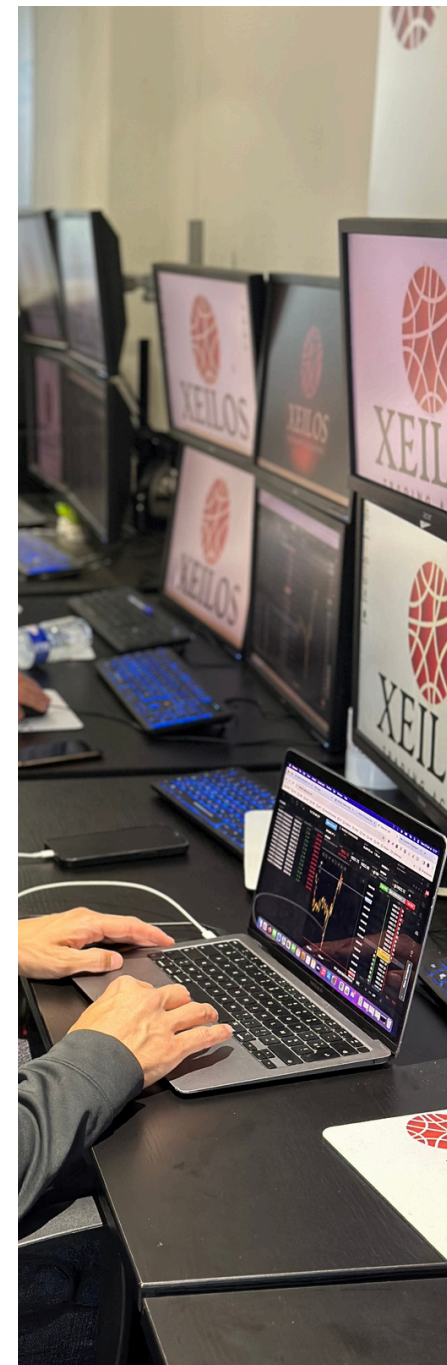

FTMO®

“This school is far more serious, with a real team of traders who actually teach you how to succeed in the markets. Plus, the diploma is officially recognized by the State, which proves their teaching methods are solid and trusted.

– Peter,
Former student at Xeilos

JOIN XEILOS TRADING

At Xeilos, our mission is to make the world of finance and trading more accessible, and to open up the trading profession to everyone.

That's why our programs are designed to welcome beginners, with specific conditions for entry.

Our teaching approach focuses on building a strong foundation, allowing learners to develop advanced skills over time — and ultimately pave the way for a successful career in trading.

DEGREES AND CERTIFICATIONS

Our courses at Xeilos offer official diplomas and recognized certifications.

By completing our programs, you can earn recognized skill block validations under

RNCP37437 and RNCP38601 – Expert in Financial Markets.

This Level 7 certification officially attests to your expertise and professional competence in financial markets,

opening the door to a wide range of career opportunities in trading and finance.

Our programs are designed to ensure that you acquire all the key skills needed to succeed as a Financial Markets Expert.

WHAT DOES RNCP CERTIFICATION MEAN?

The RNCP is the **National Directory of Professional Certifications (Répertoire National des Certifications Professionnelles)**. It is managed by France Compétences, a public body under the authority of the French Ministry of Labor.

An RNCP-certified title guarantees that the skills acquired and the career outcomes are aligned with what the training program promises in terms of job roles and professional level.

TRAINING PROGRAMS WITH QUALIOPi CERTIFICATION

This government-issued certification, granted following regular external audits, reflects

the high quality of Xeilos Trading's processes in developing its students' skills and competencies.

ADVANCED TRADER COURSE

SCALPING & ORDER BOOK

STOCK MARKET & TRADING

136 h

PRICING:

 4 990 EUROS

ADVANCED TRADER TRAINING -

Scalping & Order book - Stock Market & Trading

This course aims to identify the key mechanisms of macroeconomics and their impact on management decisions, while deepening the analysis of the order book and scalping strategies.

It is part of a broader curriculum that can lead to certification as a Financial Markets Expert—an advanced qualification aligned with careers in Corporate and Investment Banking (CIB).

The certification is designed to validate the essential skills required throughout the three phases of a financial product's lifecycle:

- In the front office (analysis, statistics, order book, and scalping strategies)
- In the middle office (risk control and management)
- And in the back office (trade reconciliation between buyer and seller)

ACCESS DEADLINES

A **14-day** delay applies from the moment registration is validated.

TRAINING ACCESSIBILITY FOR PEOPLE WITH DISABILITIES :

This program is open to individuals with disabilities.

Contact : Gregory CACACE

THIS TRAINING PROGRAM AIMS TO:

- Analyse financial and economic information to identify current and future economic trends.
- Assess economic phases to optimise investment decisions.
- Conduct sector analysis—defining cyclical indicators—to anticipate market movements.
- Set up programmes or tools for data retrieval and analysis to make the data actionable.
- Select equities and bonds for inclusion in an investment portfolio.
- Analyse financial information to identify attractive investment opportunities.
- Evaluate the economic outlook of industries and companies to determine their value-creation potential.
- Integrate ethical and environmental factors into an equity portfolio and select bonds for inclusion.
- Analyse financial information to pinpoint advantageous bond-investment opportunities.
- Evaluate and adjust bond portfolios to maximise returns while controlling risk.
- Analyse financial information to identify advantageous investment opportunities.
- Assess the economic outlook of sectors and companies to gauge their value-creation potential.
- Evaluate and adjust portfolios to maximise profitability while managing risk.
- Monitor portfolio asset performance and make strategic adjustments in response to market movements.
- Use financial indicators and valuation models to decide when to buy and sell assets.
- Analyse a client's risk profile.
- Implement a regulated risk-profile questionnaire.
- Offer a range of financial products that comply with ethical standards for stock-market investments.

TARGET AUDIENCE :

- finance professionals, investment advisers, traders, portfolio managers;
- and anyone who meets the course prerequisites.

PREREQUISITE :

Candidates wishing to enrol in this programme must meet one of the following criteria:

- Hold a **Bachelor's degree** (EQF Level 6) in the relevant discipline or in a closely related field;

or

- Gain admission on the basis of an **application file**, following an individual review of their academic and/or professional background.

TRAINING OBJECTIVE :

By the end of the programme, the trainee will have been introduced to the various mechanisms of macro-economics and their impact on management decisions.

Sequence 1: Conduct a macroeconomic analysis drawing on all available financial and economic information

Sequence 2: Perform a sector analysis

Sequence 3: Select the securities to be included in an equity portfolio

Sequence 4: Select bonds using discounting tools

Sequence 5: Monitor changes in market prices and economic indicators

Sequence 6: Advise a client on potential value-creation opportunities

TEACHING METHODS AND RESOURCES

Refer to the training programme in the appendix for a detailed description of the resources deployed to deliver the course, monitor its progress, and evaluate its results.

An attendance sheet, signed by the trainee(s) and the trainer for each half-day session, will serve as proof that the training service has been provided.

Teaching Methods :

- Expository method
- Active method
- Participative method

Instructional Aids :

- Simulation
- Case study
- Exercises
- Questionnaires

Technical Resources :

- Video projector
- Internet-connected computer
- Paperboard/flip chart
- Cloud storage
- Pre-recorded videos
- Personal workspace on the website

Learning Materials :

- PDF course handouts
- Video resources
- Standard programme outline

INSTRUCTOR / TRAINER

Our trainers hold a Magistère in Banking, Finance & Insurance from Paris Dauphine University.

TRAINEE SUPPORT AND MONITORING

The participant is guided by the instructor from the very start to the end of the programme. Regular follow-ups allow any necessary adjustments to the skills covered throughout the course.

Initial assessment:

- kick-off quiz at the beginning of the training.

End-of-course and post-course assessments:

- interview to review progress and confirm learning outcomes.

COURSE CERTIFICATION

In accordance with Article L.6353-1 of the French Labour Code, a certificate specifying the objectives, nature and duration of the training action, as well as the results of the learning-outcome assessment, will be issued to the trainee(s) upon completion of the course.

- 4.Annual events at our offices where participants can meet our teams.
- 5.Opportunity to visit our trading floor at the end of the programme, by appointment, to meet our traders.

All necessary arrangements to accommodate persons with disabilities will be made, in compliance with Qualiopi standards.

Under the examination regulations, any candidate may contact the certifier's disability-access officer to adapt the assessment conditions and obtain assistance from a third party during the evaluation. The materials and equipment required for the assessments can be modified accordingly. On the advice of the disability-access officer, and in keeping with the requirements of the certification framework, the assessment format itself may be adjusted. Upon a duly reasoned recommendation from the disability-access officer, the certification jury may decide to waive certain assessment criteria provided that both of the following conditions are met:

- 1.The exemption does not call the candidate's overall professional competence into question.
- 2.Because of the nature of the disability, the criterion would not apply in the candidate's future professional practice.

This programme also grants you access to the Financial Portfolio Management programme.

EXAM

Students are hereby informed that successful completion of the programme is strictly contingent upon passing the final examination.

This examination takes the form of a compulsory case study whose purpose is to assess each student's ability to apply—appropriately and effectively—the skills acquired during the course.

To have their training validated, students must complete the case study under the prescribed conditions and obtain at least the minimum mark required in line with the established assessment criteria.

If this examination is not passed, no certificate of completion can be issued
